

Use HbbTV as digital tool for steerable pilot format testing

Improve results of testing through real case experiences

New efficient and valid way of testing TV formats via HbbTV

New technical approach

- Streaming via HbbTV
- Access via secured token
- Steered time and place to watch
- Increase of validation
- Controlled natural testing environment incl. competition

The case – Kampf der Köche

Realization

ProSiebenSat.1 format testing department Technical realization by TeraVolt

Timeframe

June 6th, 2016; extended access time 6-10pm

Approach

Qualitative testing w/ 2 different groups

10 test persons via HbbTV 40 test persons in control group Afterwards guided group discussion

Questionnaire

10 questions about the format after consumption

7

Entry via HbbTV world of specific channel

Hidden page only achievable through specific code in HD text

Request to enter token – security system state-of-the-art

Video starts with individual watermark sign for security reason

Afterwards QR code for the survey

Outcome

Valid test results: consistent and comparable outcome of HbbTV and control test groups

Positive usability experience and intrinsic motivation of test persons

Technical stability and easy access approach

Reflects total test results and correlates with on air launch

Learnings

Learnings

1

 Challenges with outdated TV devices

2

 Challenge for agency to acquire appropriate test persons who have used HbbTV and conform to criteria

Mitigation

 Detailed testing necessary also on "exotic" devices

 Suggestion: set-up crowd testing community within the HbbTV.org members

Further push HbbTV
 with product features
 and marketing campaigns

Outlook

Try HbbTV only case

Align with existing mobile solution

Quantitative upscaling by panel approach

Improve approach through A/B testing

Next testcase ongoing

Thank you!
