

HbbTV Operator Applications

9th May 2018, DTVP / Smart Media

Heinrich E. Haase, Project Coordinator HbbTV

- Update HbbTV
- Operator Applications: What? Why?
- Status Operator Applications
- Summary

Update HbbTV

 in regular operation  announced / trials  under consideration

- HbbTV 2.0.1 (ETSI: TS 102 796 V1.4.1)
 - UK + Italy features added
- HbbTV 2.0.2 (ETSI under preparation)
 - Support for HDR, HFR Video and Next Generation Audio added

- Operator Applications (OpApps) Specification has been published as an extension to the Core Specification

- OpApp is an HbbTV Application that provides access to live channels and on-demand functionality from an Operator and can substitute the STB.

OpApps: What? – Use Cases

STANDARD

- No spec work required
- Example: **RED** starts Broadcaster App, **GREEN** Operator environment

PRIVILEGED

- Runs directly on a TV, replaces TV-UI partially with a branded Operator experience
- Like another „Source“
- Assumes bilateral agreement Operator / TV manufacturer

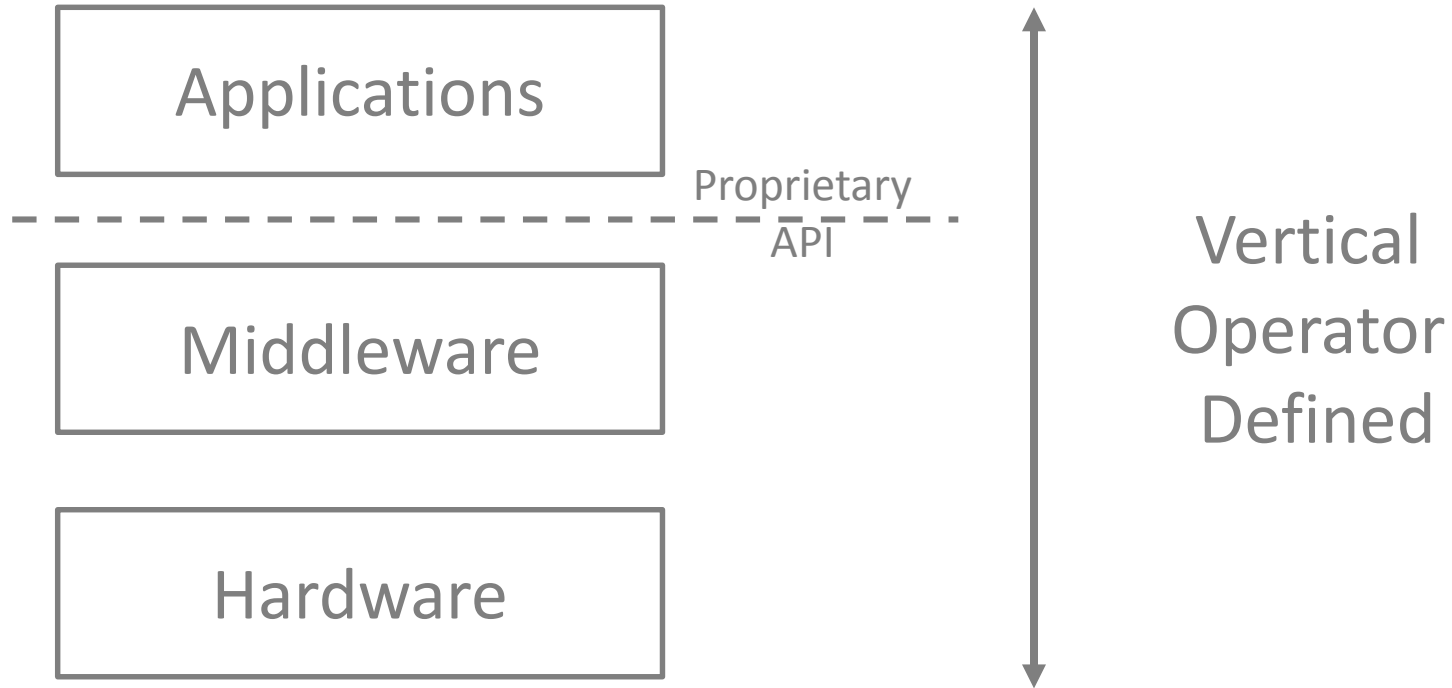

OPERATOR-SPECIFIC

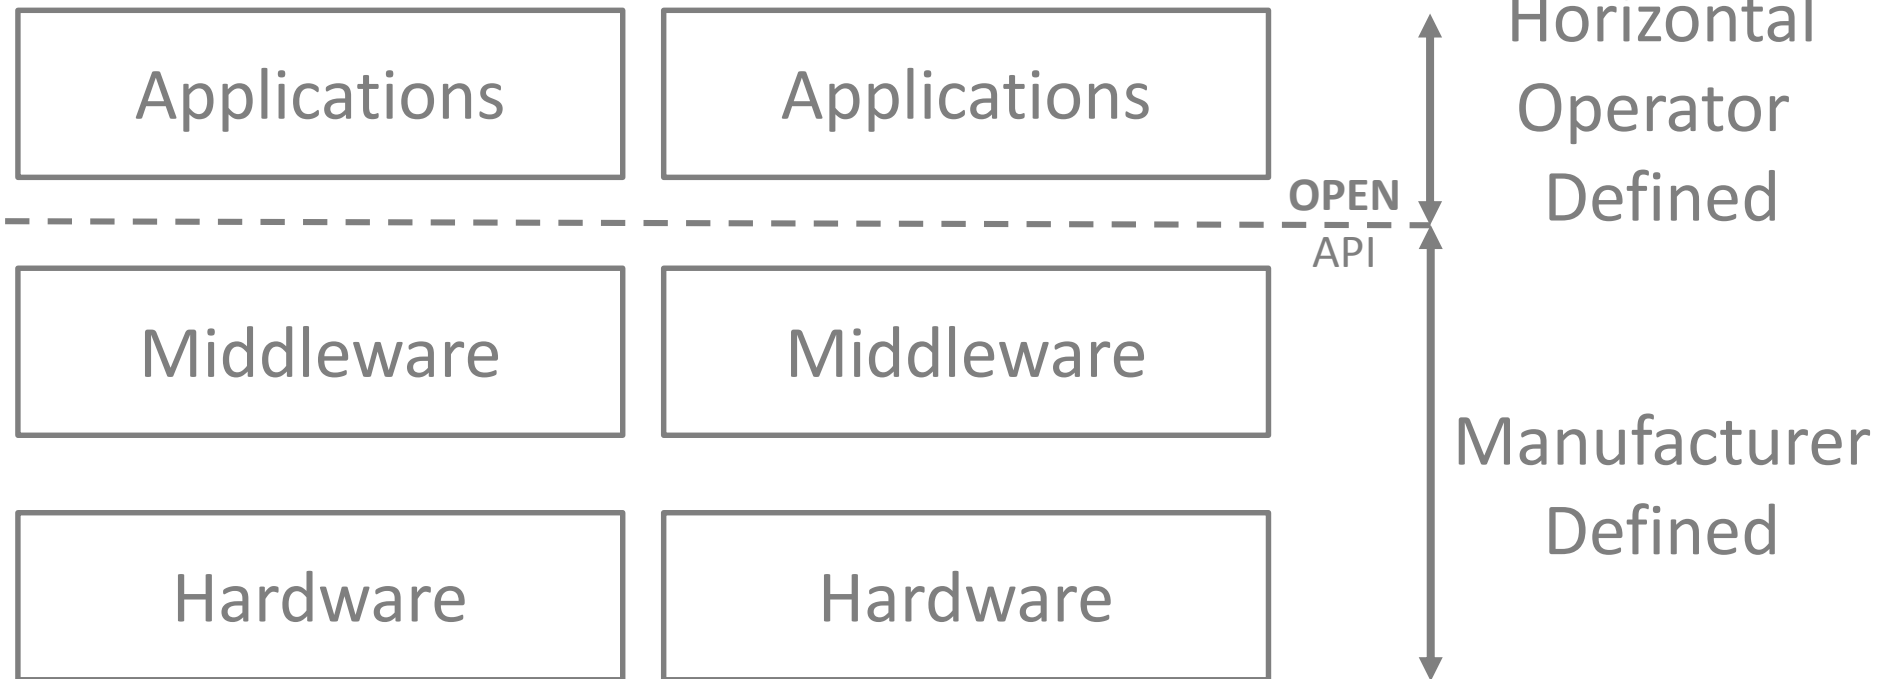

- Intended for white-label STBs
- Replaces all of the STB-UI by an Operator UI
- Assumes bilateral agreement Operator / TV manufacturer

OpApps: What?

OpApps: What?

OpApps: Why?

HbbTV

- Expands customer base for HbbTV Platforms
- Enriches HbbTV Ecosystem
- Makes life easier for consumers

OPERATORS

- Mature and well-deployed standard!
- Compatible with existing Specification and Broadcaster Apps
- More Content; reduces complexity & cables
- Branded experience to their customers
- Consistent customer support

CONSUMERS

- Reduces complexity
- Full control of TV content
- Less cables / equipment at home
- More content by accessing to all Operator's services

- HbbTV ordered OpApps Test Cases in Jan 2018 to support adoption and to secure excellent implementation quality!
- Reviewing of the Test Cases is ongoing by members and external resources!
- OpApps Specifications have been published!
- Integration of OpApps into the HbbTV Test Suite is planned for mid 2018 – thus products could appear in the market in 2019!
