

# **HD+ Integrated in TV Sets**

## **HbbTV Operator Application – Best practice report by HD+**

Alexander Sacher, Arne Redl

14 July 2020

# HD+ & SES

## A short reminder

# The SES Video challenge:

DTH needs to stay competitive  
concerning attractiveness for the  
end consumer

# Astronaut und Satellit Satellit und Fernsehen

## Fernsehen und HD+

Es gibt Dinge, die gehören  
einfach zusammen.

Erlebe jetzt mit HD+ alle  
Rennen der Formel 1 auf  
**RTL** UHD

HD+ Sender Paket

23 Private  
HD-Sender

2 Ultra  
HD-Sender

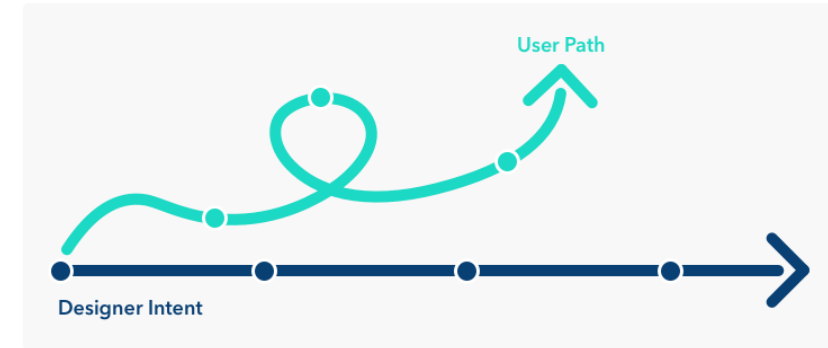

40 Freie  
HD-Sender

# Why launching a HD+ HbbTV Operator App

We believe it's **GAME CHANGING**.

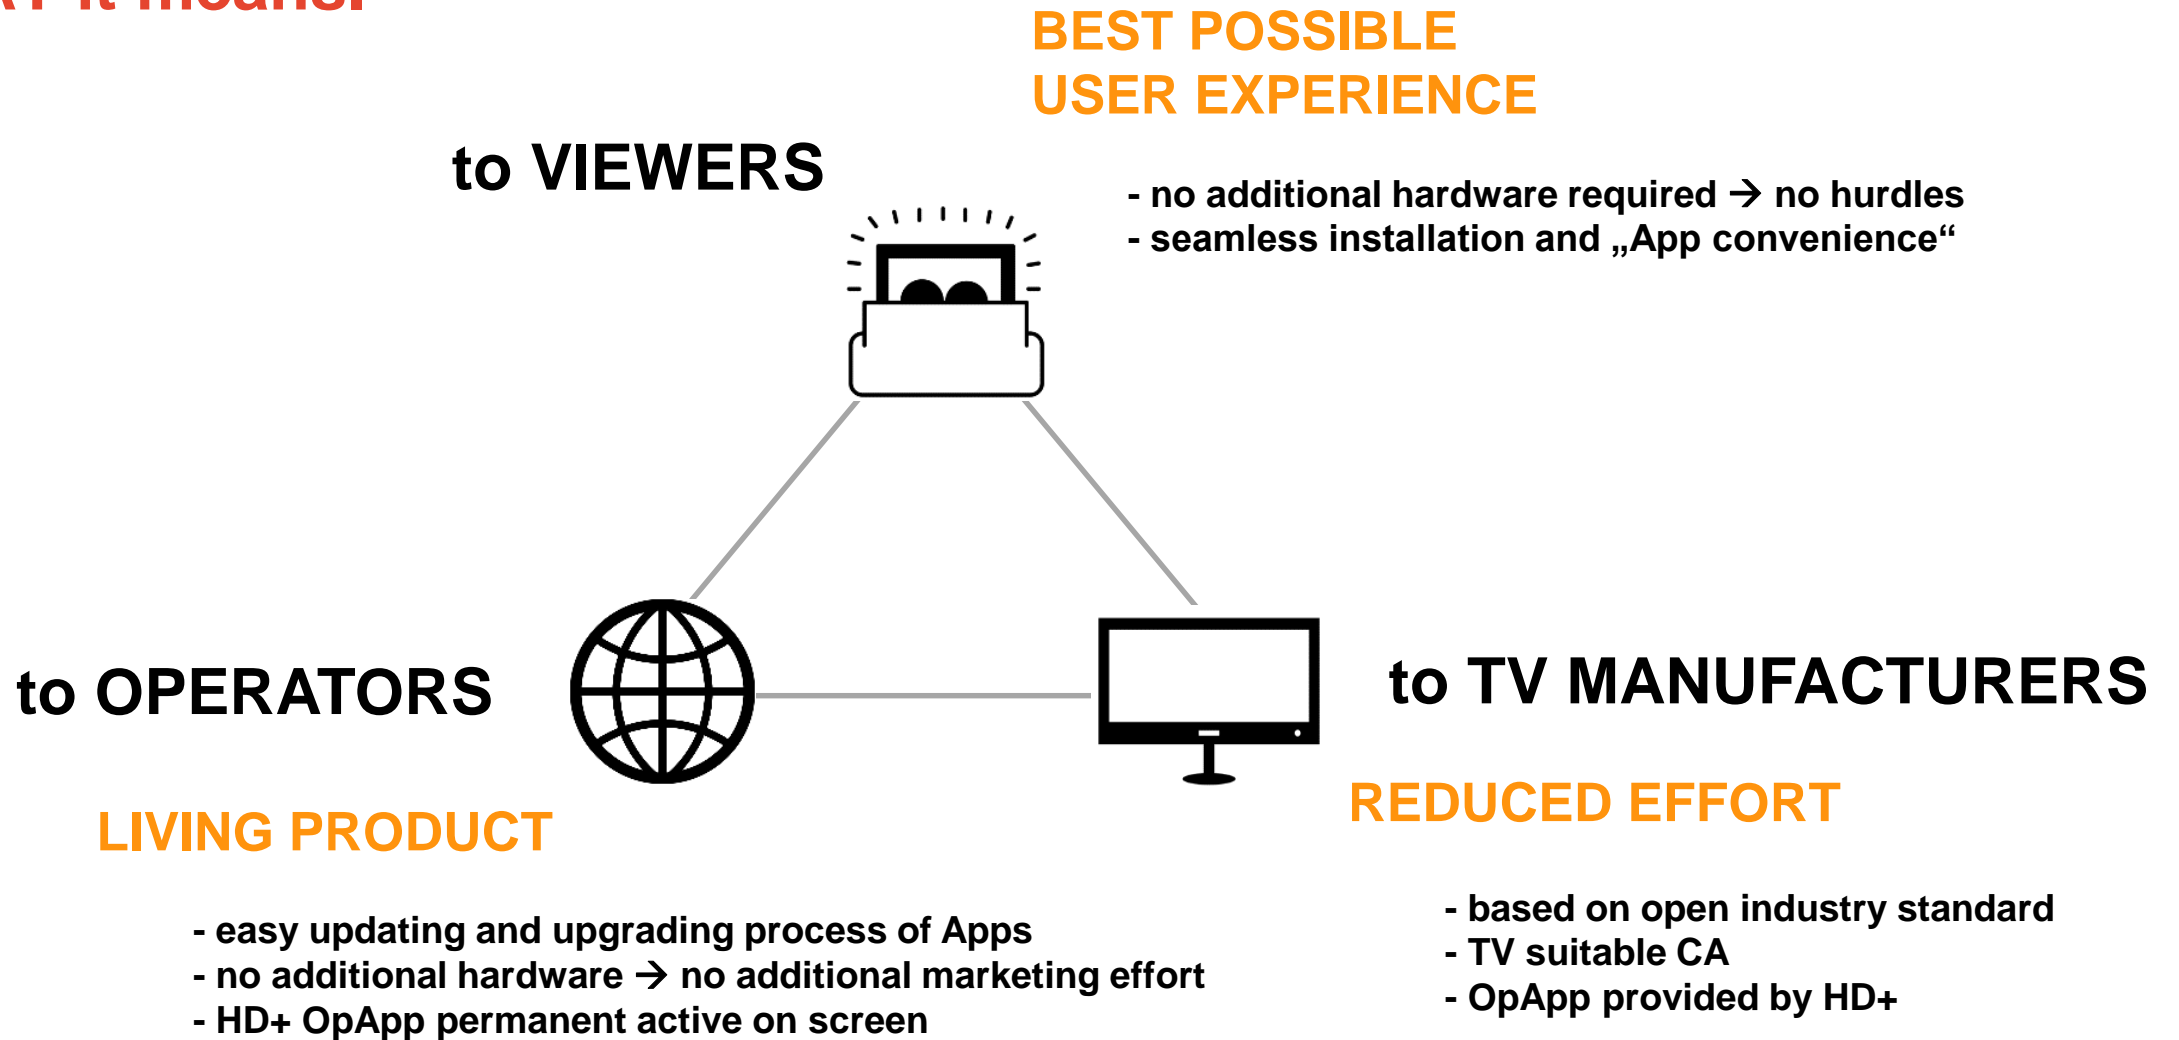

PROVIDE a **persistent**  
and **consistent**  
USER JOURNEY on TV

ACTIVATE the  
**unutilized** COOPERATION POTENTIAL  
between Operator and TV Manufacturer

## The best HD+ of all time: HD+ Integrated in TVs

**Das beste HD+  
aller Zeiten.**

**HD+ Sender-Paket**

**24** Private  
HD-Sender

**2** Ultra  
HD-Sender

**HD+ Komfort-Funktion**

 **Neustart**

 **Mediatheken**

 **TV-Guide**

**40** Freie  
HD-Sender

### What we had already!

- ▶ 24 of the largest private broadcasters in HD quality
- ▶ 2 exclusive channels in UHD quality such as RTL UHD
- ▶ Free 6-month trial of HD+ without registration

### The new functions integrated in the HD+ Op App!

- ▶ Integrated CA → no extra hardware
- ▶ HD+ “Komfort-Funktion” **at no extra charge**
  - Instant Restart (“Neustart”)
  - Catchup („Mediatheken”)
  - integrated EPG („TV-Guide“)

# User experience with HD+ integration

## First Time Installation

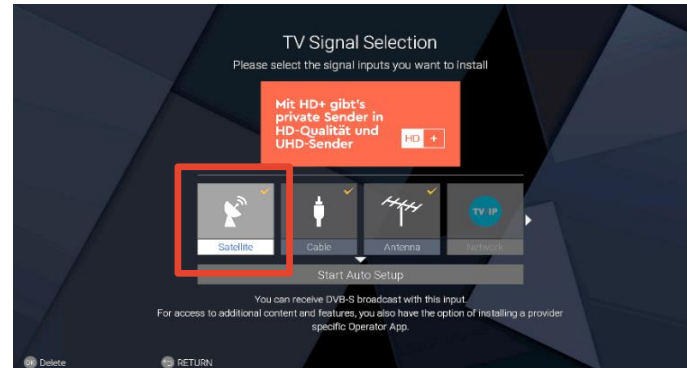

# HD+ integrated in TVs – Installation

## TV First Time Installation

### “Two clicks”

Installation of HD+ after internet setup and channel search

- 1 First hint for HD+ when selecting the reception method

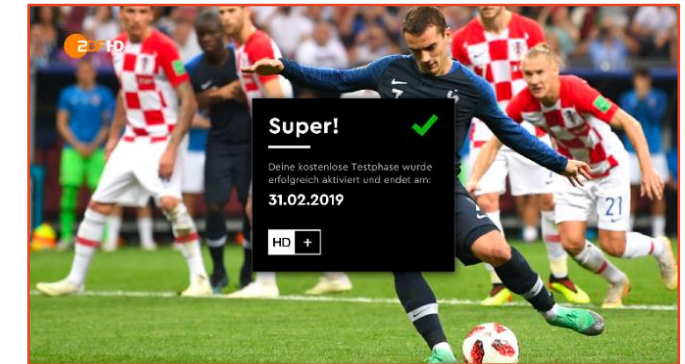

- 2 Option for installation after channel search

- 3 Activation of HD+ after first time installation

- 4 Starting of the six month free period

# HD+ integrated in TVs – Installation

## Later Installation via Home-Bar or App Store

### Later installation

via Home Bar and App Store

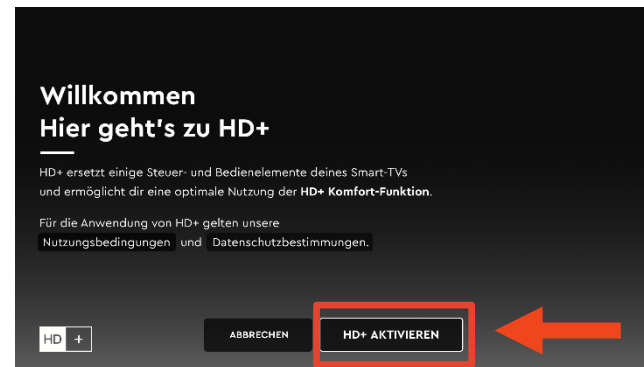

1 Via Home Bar or App Store

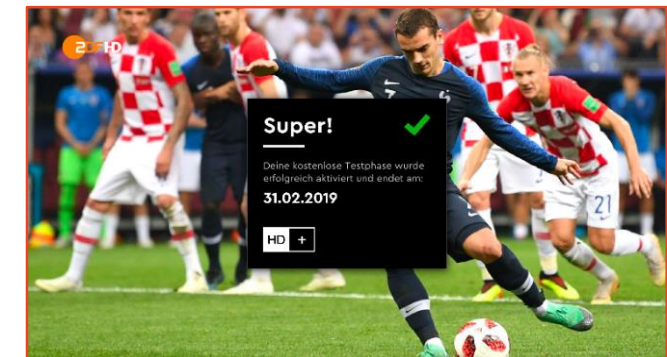

2 Installation after overview about advantages

3 Activation

4 Starting of the six month of free period

# **Installation of Operator Application**

## **Details**

### **Technical background**

- ▶ Download and discovery according to specification (via URI\_linkage\_descriptor in BAT with FQDN)

### **Challenges**

- ▶ Distribution of certain app versions for dedicated models based on own release/distribution system
- ▶ Based on User Agent String (UAS)

### **Out of the specification**

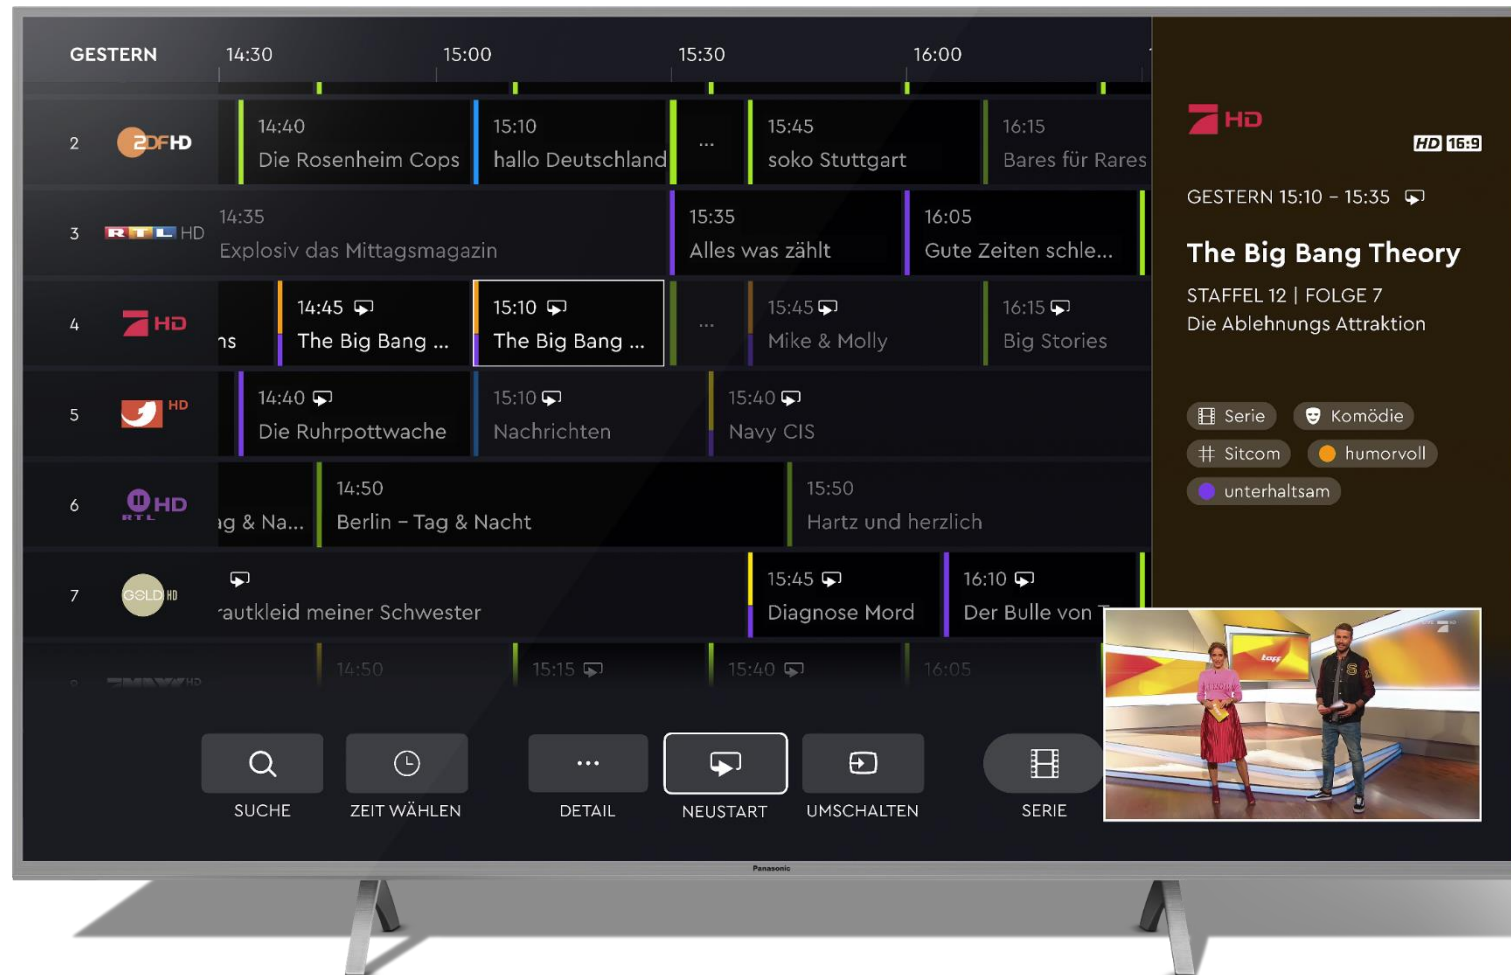

- ▶ Agreement with manufacturer where/how in first time installation the Operator Application is offered
- ▶ Agreement with Manufacturer where/how a later installation of Operator Application is offered
- ▶ The prominent offering of the Operator Application is essential for good installation rates

# UI/UX Overview

## SI Banner

# UI/UX Overview

## Home Bar

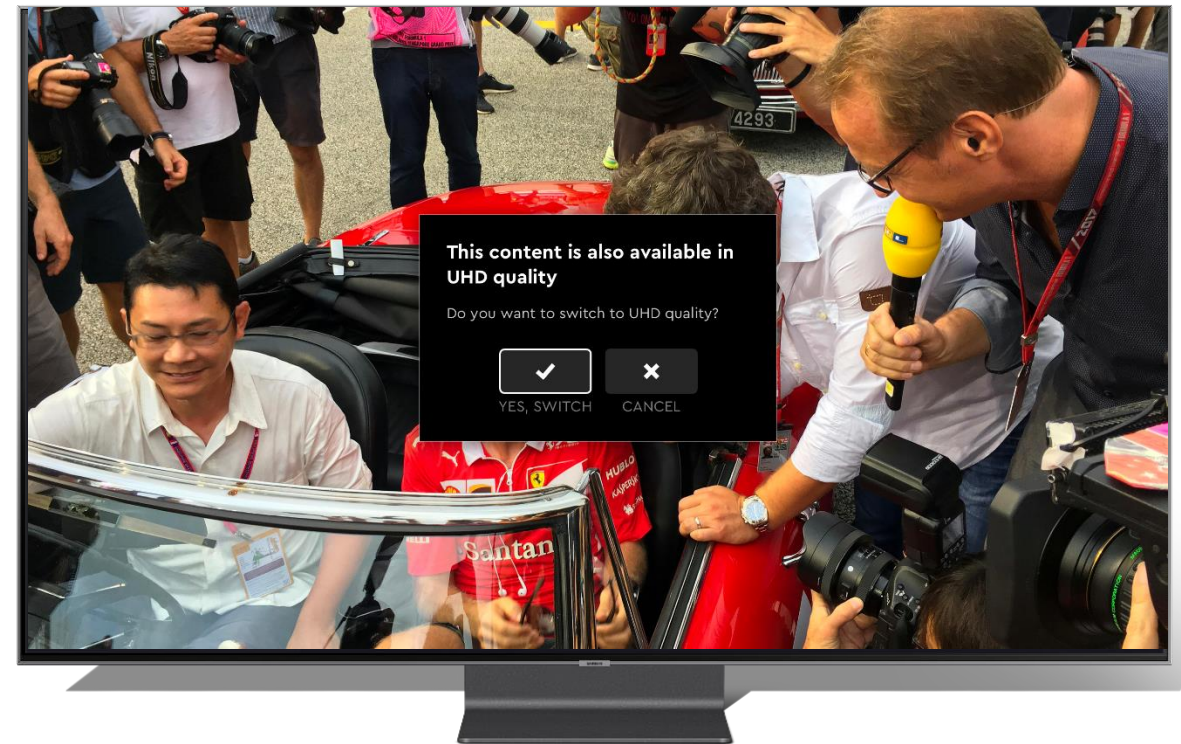

## “HD+ Komfort-Funktion” – Product

### Switch to UHD version at UHD parallel broadcast

- ▶ If a programme is broadcasted in parallel in UHD quality, a popup message is displayed that programme is available in UHD quality.
- ▶ TV viewer can switch to UHD version by simply pressing OK button.

# EPG

## Background

### Electronic Programme Guide and SI Banner

- ▶ Replacing the native TV UI elements
- ▶ Information source:
  - Internet database (aggregated HD+)
  - DVB-SI (EIT) as fall-back

### Recordings

- ▶ Scheduling of recordings via EPG

### Search

- ▶ Search over all contents (future, now, restart, on-demand)
- ▶ Backend driven

### Conclusion

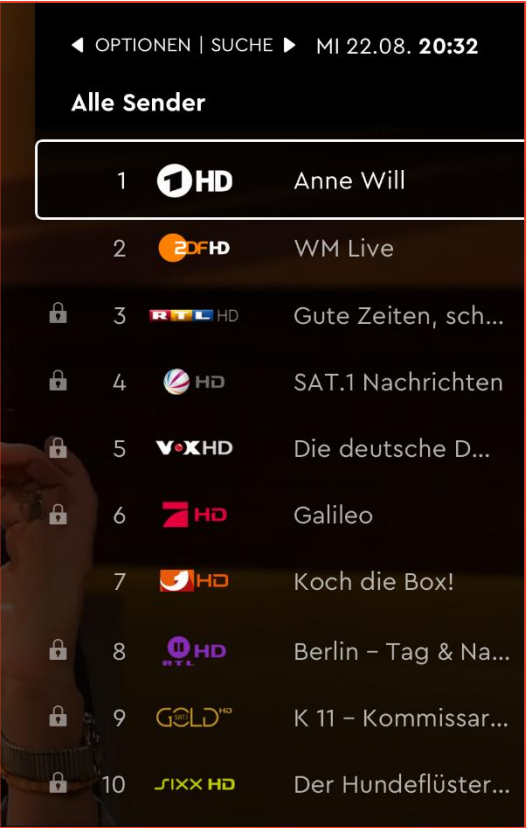

- ▶ No big issues on specification side
- ▶ Implementing of recordings scheduling quite complex

Main UI elements of the Op App	Replacing	New
EPG	X	
Channel list	X	
SI banner	X	
Home bar		X
Search		X
Player UI (OTT)		X
App settings		X

# Channel List Management

## A Challenge...

	Case 1	Case 2	Case 3
Problem	<ul style="list-style-type: none"><li>▶ User deselects “encrypted channels” in first time installation</li></ul>	<ul style="list-style-type: none"><li>▶ A new channel is added by the operator</li></ul>	<ul style="list-style-type: none"><li>▶ User wants to reorder the channel list</li></ul>
Result	<ul style="list-style-type: none"><li>▶ Channels are missing in Operator Application</li><li>▶ No “easy” way to add them</li></ul>	<ul style="list-style-type: none"><li>▶ Channel is missing in the channel list</li><li>▶ No “easy” way to add the channel</li></ul>	<ul style="list-style-type: none"><li>▶ Inconsistency between native list and operator’s list or</li><li>▶ “Broken” UX (reordering via native TV UI)</li></ul>

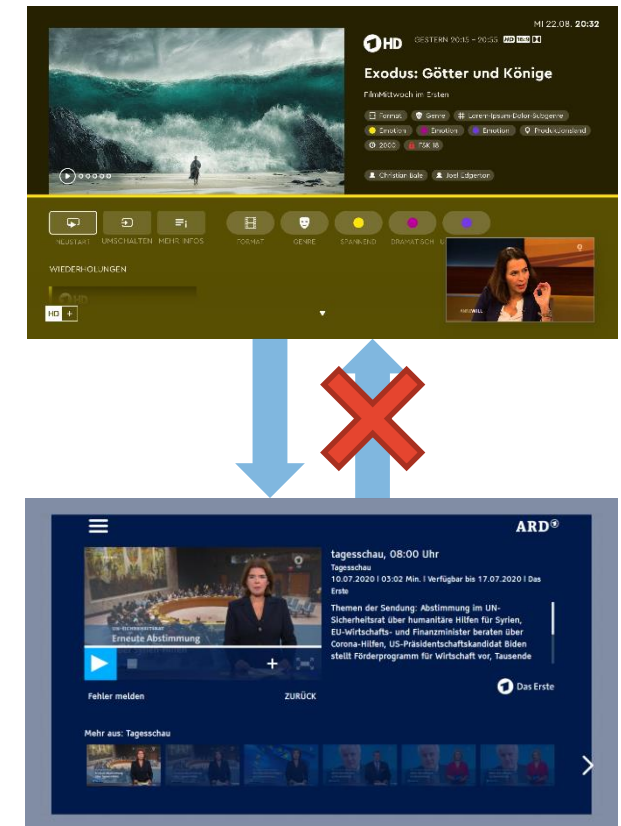

# Playback of OTT content

## Working quite good out of the box

On-demand content is needed to enrich the broadcast product!

	Own streams	Linking approach
Approach	<ul style="list-style-type: none"><li>▶ For channels of the HD+ channel package: streams by HD+</li></ul>	<ul style="list-style-type: none"><li>▶ For public broadcasters: linking approach</li></ul>
Details	<ul style="list-style-type: none"><li>▶ MPEG-DASH</li><li>▶ DRM protected</li></ul>	<ul style="list-style-type: none"><li>▶ Linking to existing HbbTV apps</li><li>▶ Deep link to the content detail page</li></ul>
Learnings	<ul style="list-style-type: none"><li>▶ DRM &amp; MPEG-DASH worked quite well “out of the box”</li><li>▶ Lifecycle management</li><li>▶ Own player UI/UX</li></ul>	<ul style="list-style-type: none"><li>▶ Implementation with only little effort</li><li>▶ “Broken” UX (no back journey)</li></ul>

# HbbTV

## Next Step and Conclusion

# HD+ Operator Application

## Conclusions

**The HbbTV Operator Application is a great success for HD+**

- ▶ The HbbTV Operator App is definitely a great success for HD+ and **stable in daily operation!**
- ▶ HbbTV Operator App specification is comprehensible and well thought through

**Nevertheless there are challenges:**

- ▶ The integration of an Operator Application is still a challenges for both, the manufacturer and the operator
- ▶ Deprecations of APIs need to be considered carefully in the future
- ▶ Channel List Management is “a challenge”
- ▶ User journey for linking from the Operator Application to other HbbTV applications
