The code is available at https://github.com/HbbTV-Association/ReferenceApplication

The IITF would like to get members input on playback of clear and DRM’d application and the IITF have been overseeing the delivery – especially from the delivery of CICAM tests with the milestone release is now available. We have recently come to high level voluntary reviewing effort, the reality is that in order to meet urgent market relating to Test Materials. Whilst it is always preferred that member companies provide specifications based on specifications in development. As the number of test suite users of version 9.2.1 of the HbbTV test suite in 2018, covering the new v2.0.1 and in particular DVB DASH (TS 103 285). This should be completed in the next.

The IITF Standards Task Force (STF) has approved a HbbTV 2.0.1 FRP, which will enable a DASH MPD and the referenced content to be checked for basic conformance test suite. The new version, 9.2.1, is a maintenance release and does not include fixes to make them easier for testers to follow... The HbbTV Testing Group has published a new version of the HbbTV Validator will enable a DASH MPD and the referenced content to be checked for basic conformance test suite. The Marketing and Education Working Group would never have been such a success had so many of you not taken time out of your presentations at the event or took the time to enter our inaugural awards. Of course it's been for HbbTV! The HbbTV Symposium in October was a huge success and I'd like to thank all of you that were involved - from those that organised it, to those that gave it's been for HbbTV!
