

HbbTV Apps in an OTT Centric World

An Exploration

Aggregating Content in HbbTV Universe – HD+

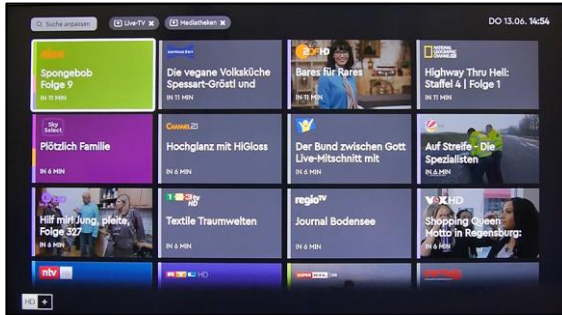

HOME PORTAL

CHANNEL LIST

ZAPPING / EVENT BANNER

CONTENT CATALOG

TV GUIDE

Hybrid experience including **Live** content from satellite and **Start-Over + Catch-Up** delivered via OTT

Benefits of HbbTV in OTT – no STB, Lots of Apps

Remove the need
for a STB

Cheapest path
to win new subscribers
without CAPEX

Operator application
controlling the TV UI and
the user experience

Imagine buying a new TV, connecting to your network, and being able to immediately watch all your pay-TV channels – all without an extra set-top box and with only one remote control

How to Stand Out in a Sea of Apps?

Remove the need
for a STB

Cheapest path
to win new subscribers
without CAPEX

OPERATOR
UI/UX

Operator service
discovery & activation
during first installation

Visibility of Operator
service and quickest
on screen activation

Operator application
controlling the TV UI and
the user experience

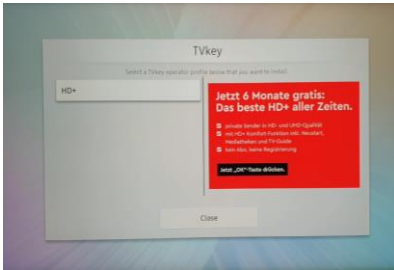

Operator application
stands out of the crowded
AppStore ecosystem

Service discovery & activation enabled through TVkey* greatly improves consumer visibility and service awareness

* Note: TVkey has been defined jointly by Nagra and Samsung – specs are open for anyone in industry

Customer Acquisition Boosted by Service Discovery

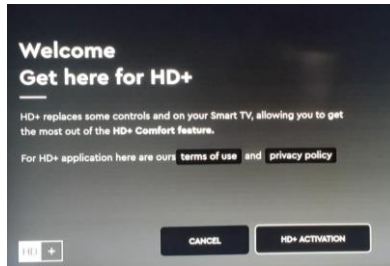

1

SERVICE DISCOVERY

HD+ Service is discovered during the TV installation and shown to the user

2

SERVICE ACTIVATION

Users accepts to start the 6 months free period and triggers the installation of HD+ Service and App

3

SERVICE INSTALLATION

HD+ App is persistently installed on the TV and the access to the content is granted

OTT Inspired Customer Onboarding

Enabling an impulsive purchase of Operator service with a quick customer activation

Benefits from OTT Ecosystems: Time to Market

Connected TVs are just one device in the OTT ecosystem

Customer centric approach with adoption of UX frameworks that span all devices

How to ensure a rich user experience with no compromises that is equally consistent on **smartphones, tablets, desktop, Android TV, Apple TV and game consoles?** Deployments coming soon...

In summary...

- **OTT and apps** have been a part of HbbTV for a while
 - Including OTT streaming, channel list discovery etc.
- Success for operators depends on **customer awareness** and **service discovery**
 - TVkey approach with open ecosystem approach
- **User experience** is critical for ongoing engagement
 - Easy **on-boarding** aligned with best practices in OTT
 - **Local install** of HbbTV app to minimize time to interact (TTI) and time to switch between apps (e.g. deep linking)
 - Cross-platform **consistency** between HbbTV and other platforms
- **Nagra's vision**: bring open TVkey ecosystem and enable consistent UX despite differences in native players, CAS/DRM and device OS

köszönöm ! תודה dĕkuji

mahalo 고맙습니다
